Complete Chemical List — Westline / Beacon Data Center Air-Permit Application

Permit Nos. 184380 / PSDTX1710 / GHGPSDTX275 · Westline TX Holdings LLC / Beacon Data Centers

Source: "Air Toxics MERA" worksheet, workbook 20260612-01_calculations.xlsx, rows 11–157 · 69 chemicals total · sorted most → least by lb/hr

How to read this table. The "Emissions (lb/hr)" column is the applicant's calculated facility-wide hourly emissions of each chemical, summed across engines, heaters, generators, tanks, and fugitive sources. The "Short-term ESL" is the state's 1-hour Effects Screening Level in micrograms per cubic meter, the health-protection threshold TCEQ uses to compare against modeled ground-level concentrations. The "Screening Result" column reflects where in the applicant's multi-step Modeling and Effects Review Applicability (MERA) process each chemical was ultimately cleared: some at the earliest "below de minimis" step, most at the "10% of ESL" screen, and about a dozen requiring detailed refined dispersion modeling that the applicant reports as compliant.

Important context. Every chemical below is reported by the applicant as ultimately meeting the applicable state screening standard. Public-comment concerns about the analysis focus on the assumptions used in the refined modeling — in particular that only 200 of the 240 authorized engines were modeled, that older equipment sizes were used for line heaters, and that the applicant's own technical memorandum states parts of the summary "are not representative of the entire Facility." Whether the refined "pass" verdict holds under corrected assumptions is a question for TCEQ's health-effects reviewers to answer.

#	Chemical	Emissions (lb/hr)	Short-term ESL (µg/m³)	Screening Result
1	Ammonia	156.164	180	Passes refined modeling
2	Acetaldehyde	95.340	120	Passes refined modeling
3	n-Pentane	29.640	59,000	Passes at 10% ESL screen
4	Methanol	28.500	3,900	Passes refined modeling
5	Formaldehyde	16.532	15	Passes refined modeling
6	Acrolein	14.655	3.2	Passes refined modeling
7	Methylcyclohexane	14.022	16,100	Passes at 10% ESL screen
8	Hexane (mixed isomers)	13.186	5,600	Passes at 10% ESL screen
9	n-Butane	6.167	66,000	Passes at 10% ESL screen
10	Benzene	5.341	170	Passes refined modeling
11	Toluene	4.772	4,500	Passes at 10% ESL screen
12	n-Octane	4.001	5,600	Passes at 10% ESL screen
13	1,3-Butadiene	3.044	510	Passes at 10% ESL screen
14	2,2,4-Trimethylpentane	2.850	5,600	Passes at 10% ESL screen
15	Cyclopentane	2.588	17,000	Passes at 10% ESL screen
16	Xylene	2.180	2,200	Passes at 10% ESL screen
17	n-Nonane	1.254	4,800	Passes at 10% ESL screen
18	Isobutyraldehyde	1.151	410	Passes at 10% ESL screen
19	Polycyclic aromatic hydrocarbons (PAHs)	0.6230	0.5	Passes refined modeling
20	Ethylene dibromide	0.5050	150	Passes at 10% ESL screen
21	1,1,2,2-Tetrachloroethane	0.4560	70	Passes refined modeling
22	Ethylbenzene	0.4530	26,000	Passes at 10% ESL screen
23	Carbon tetrachloride	0.4180	2,400	Passes at 10% ESL screen
24	1,3,5-Trimethylbenzene	0.3850	4,400	Passes at 10% ESL screen

#	Chemical	Emissions (lb/hr)	Short-term ESL (µg/m³)	Screening Result
25	1,1,2-Trichloroethane	0.3630	550	Passes at 10% ESL screen
26	Chlorobenzene	0.3470	460	Passes at 10% ESL screen
27	Chloroform	0.3250	100	Passes at 10% ESL screen
28	1,2-Dichloropropane	0.3070	460	Passes at 10% ESL screen
29	1,3-Dichloropropene	0.3010	45	Passes refined modeling
30	Phenol	0.2740	150	Passes at 10% ESL screen
31	1,1-Dichloroethane	0.2690	4,000	Below de minimis (step 1)
32	1,2-Dichloroethane (polymer w/ ammonia)	0.2690	Must meet NAAQS	Passes at 10% ESL screen
33	Styrene	0.2690	110	Passes at 10% ESL screen
34	1,2,3-Trimethylbenzene	0.2620	4,400	Passes at 10% ESL screen
35	Methylene chloride	0.2280	3,600	Passes at 10% ESL screen
36	Vinyl chloride	0.1700	20,000	Passes at 10% ESL screen
37	1,2,4-Trimethylbenzene	0.1630	4,400	Passes at 10% ESL screen
38	Naphthalene	0.0520	440	Passes at 10% ESL screen
39	Tetrachloroethylene	0.0280	2,000	Passes at 10% ESL screen
40	Chloroethane	0.0210	2,700	Passes at 10% ESL screen
41	Chrysene	0.0085	0.5	Passes refined modeling
42	Paraffins (petroleum), normal C5–20	0.0085	3,500	Below de minimis (step 1)
43	Fluorene	0.0058	10	Below de minimis (step 1)
44	Acenaphthylene	0.0036	100	Passes at 10% ESL screen
45	Acenaphthene	0.0018	100	Passes refined modeling
46	Fluoranthene	0.0018	0.5	Below de minimis (step 1)
47	Pyrene	0.0016	0.5	Below de minimis (step 1)
48	Vanadium	7.0e-4	0.66	Passes at 10% ESL screen
49	Nickel	6.0e-4	0.33	Below de minimis (step 1)
50	Benzo[b]fluoranthene	4.0e-4	0.5	Below de minimis (step 1)
51	Chromium, elemental	4.0e-4	3.6	Passes at 10% ESL screen
52	Dichlorobenzene, all isomers	4.0e-4	900	Below de minimis (step 1)
53	Cadmium	3.0e-4	5.4	Passes at 10% ESL screen
54	Benzo[a]anthracene	3.0e-4	0.5	Below de minimis (step 1)
55	Benzo[g,h,i]perylene	2.0e-4	0.5	Below de minimis (step 1)
56	Indeno[1,2,3-cd]pyrene	2.0e-4	0.5	Passes refined modeling
57	Manganese	1.0e-4	2.7	Passes at 10% ESL screen
58	Benzo[e]pyrene	1.0e-4	0.5	Passes at 10% ESL screen
59	Mercury	1.0e-4	0.25	Below de minimis (step 1)
60	Arsenic	1.0e-4	3	Passes at 10% ESL screen
61	Cobalt	4.0e-5	0.21	Passes at 10% ESL screen
62	Selenium	3.0e-5	2	Below de minimis (step 1)

#	Chemical	Emissions (lb/hr)	Short-term ESL (µg/m³)	Screening Result
63	2-Methylnaphthalene	2.0e-5	200	Below de minimis (step 1)
64	7,12-Dimethylbenz[a]anthracene	1.0e-5	0.5	Below de minimis (step 1)
65	Beryllium	1.0e-5	0.02	Below de minimis (step 1)
66	Anthracene	1.0e-5	1	Below de minimis (step 1)
67	3-Methylcholanthrene	5.0e-6	0.02	Passes at 10% ESL screen
68	Biphenyl	4.0e-6	13	Passes at 10% ESL screen
69	Phenanthrene	1.0e-6	8	Not evaluated further

About this document. *This table is prepared for public information by Spencer of SanAngeloDoge.com. It is a direct extract from the applicant's own emission-calculation workbook on file with the Texas Commission on Environmental Quality; it is not legal advice.*
